

QUICK-6™ 1-0-5

Foliar Silicate Solution

TECHNICAL BULLETIN

DESCRIPTION

QUICK-6™ provides a rich source of potassium and soluble silica with ACT® for efficient leaf absorption and translocation throughout the plant. These combine to promote strong vertical leaf and stem development that is essential to managing high quality turf. **QUICK-6™** improves turf stand and green speed or stimp rating by increasing stem and leaf rigidity.

Studies have shown that foliar application of potassium and silica assist plant development following deposition of silica in the epidermal cell walls, thus enhancing the plant's ability to point its leaves towards the light source.

BENEFITS

- Promotes strong vertical leaf and stem development
