Safe Environmental Products are our Specialty

TO WHOM IT MAY CONCERN

My name is Jim Jordan, and I am the owner and developer of products offered by my companies worldwide. We developed very unique products for different markets. Pure One Environmental distributed Biofeed products for 15 years under our private label. We marketed his products for water treating in the shrimp and prawn farming industry in Australia and Thailand. The results were better than ever imagined by any of the farmers. The production increased in the harvest was more than 30%. This was the result of the lack of disease, which were the biggest problems. We sold product in Hawaii, Singapore, Japan, South Korea for the treatment of lakes, ponds and water features.

The Biofeed Agricultural products are crazy good. I sold products in South America for five years with great results. The key to the success was the direction that Mr. Dan Lee, President of Biofeed gave in the application of different products for different conditions and desired results. It only required one growing season to show the value of the product systems. Because it does not require a large volume of products, I sampled the product to show results to get the business. It was easy money and a great ROI for the sampling. I did not hear of an experience of results less than 25% increase. I got away with selling the products by promising a better than 25% increase in production. I was never disappointed or wrong.

I personally traveled to the locations and verified the success of the Biofeed product line. I am now retired after 35 years and would like to pass on the results of my success with the Biofeed product line to those who may have an interest.
