

Description:

NEW! VECTROL® is a next generation natural product designed to provide control of a variety of invasive fungi and insects that may negatively impact crop production and plant growth. It is a 100% biodegradable broad spectrum contact and systemic liquid organic formula for use on all crops, turf, ornamentals and soil.

Benefits of Use:

- Eliminate fungal crop, plant and turf stress
- Controls invasive nematodes to aid in restoring plant health and vigor
- Apply at any time up to and on the day of harvest
- Immediate field reentry following application
- Safe, organic, biodegradable formula

Field Crops / Tree or Vine Crops: Foliar band application at 50% coverage. Foliar broadcast or sprinklers: solid, set, linear and pivot (100% speed). Soil banded or injected, through drip tape or micro sprinklers up to 1-2 quart per acre.

Soil Nematode Infestations: Apply 1-2 gallon (4-8 quarts) 3X every 7-14 days via fertigation, broadcast spray, incorporated, flood, or furrow irrigated.

VECTROL® should be applied when plant tissue, root or soil analysis identifies the need and proper rate of application for this product. Best results will be obtained when application is concentrated in the active root zone or on the leaf surface. Do not spray or foliar apply this product in concentrations greater than 1%. Can be applied in combination with compatible plant growth regulators, pesticides, or other liquid fertilizers. If compatibility is in question, jar test a small quantity.

For maximum results, apply **VECTROL®** in the early morning or in the evening when air temperatures are optimum for foliar application. Do not apply during the hottest time of the day or to plants under drought or flood stress. Application timing, intervals and rates may vary according to individual crop, turf or plant. Both foliar and soil applications can be made as often as every 7 to 10 days or as needed. This product is intended as a supplement to a regular crop, turf and plant care program. Consult your local Biofeed® Representative or other agricultural specialist for crop-specific recommendations. Reenter field following treatment.

FOR PROFESSIONAL AND AGRICULTURAL USE ONLY.

Storage and Disposal: Keep container sealed when not in use. Keep product in a cool location away from direct sunlight. Store in temperatures between 5°C (40°F) and 25°C (78°F). Keep products in original container. Do not transfer into food or drink containers. Triple rinse when empty for recycling. Always dispose of container in accordance with local, state, and/or federal regulations.

Active Ingredients:

Thyme Oil	3.0%
Inert Ingredients	97.0%
Total Ingredients	100.0%

*Contains water, potassium hydroxide, and glycerin

SHAKE WELL OR STIR BEFORE USE
