OXY-LINE

LIQUID PREBIOTICS

IMPROVE GROWTH, YIELD & PROFITS!

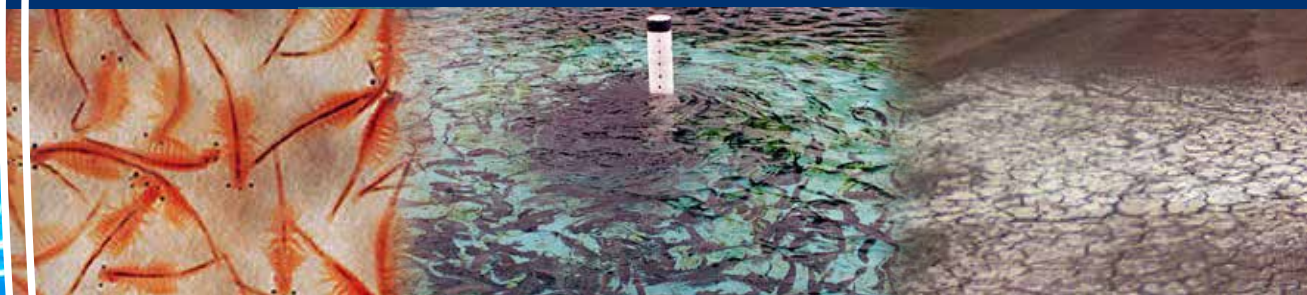

Biofeed® OXY-LINE™ ...Prebiotics with the O₂ Advantage!

Aerobic Bacteria = Higher Yields & Profits

Biofeed® OXY-LINE™ is a concentrated prebiotic and enzyme blend specifically designed for all phases of aquaculture pond management. Biofeed® OXY-LINE™ consists of several carefully selected prebiotics and specialized HDH enzymes.

This dynamic combination provides pro-biological health benefits and enhanced sludge digestion due to the action of our unique HDH enzymes that improve over-all pond health by releasing oxygen to support the growth of beneficial aerobic bacteria in your ponds.

Biofeed® OXY-LINE™ Increase Improve Growth - Reduce St

OXY-HATCH™ is a formulation of concentrated organic water stabilizers and Oxygen Releasing Enzymes specially blended to protect tender young fish and shrimp hatchlings during the pre-pond hatchery stage. Also helps to build disease resistance and hasten earlier maturity.

OXY-TERRA™ is a pond-bottom pretreatment formula that contains a concentrated blend of organic acids, enzymes and bio-nutrients designed to stimulate and feed *aerobic* bacteria in the pond bottom soil. Provides energy required by *aerobic* bacteria to break down and digest sludge, proteins, fecal coliform and fascies. Helps reduce or eliminate the growth of unwanted E-coli.

Biofeed®

Not Simply a Cost: Biofeed® OXY-LINE™

Benefits to Fish & Shrimp:

- ✓ Aids Stress Reduction & Health
- ✓ Better Feed Conversion Rate (FCR)
- ✓ Promotes Uniform Growth
- ✓ Enzymatically Aids Digestion
- ✓ Reduces Mortality Rate
- ✓ Greater Inhibition of Pathogens & Disease
- ✓ Aids Earlier Maturation in the Hatchery Stage
- ✓ Reduces Pond Transfer Shock
- ✓ Faster Break-Down of Pond Bottom Sludge

Increases Dissolved Oxygen Levels,
Reduces Stress - Increase Your Profits!

OXY-POND™ is a rich source of specialized Oxygen Releasing Enzymes that release oxygen into the water! This action complements paddle wheel or mechanical aeration systems to ensure adequate oxygen levels for growing healthier fish and shrimp and maintaining *aerobic* bio-systems to digest unwanted sludge and reduce disease occurrence.

Biofeed™ is an Investment in Pond Success!

Aquatic Scientists agree that the toxicity found in most ponds stems from a lack of oxygen. Ponds lacking adequate oxygen are known as *anaerobic*, while ponds with adequate oxygen are referred to as *aerobic*. Bad odors and ammonia are the first indicators that the pond is *anaerobic* or sick. Therefore, many Aqua-farmers mechanically aerate their ponds, often 24 hours a day using pumps or paddles that stir air into the water... but this practice is very costly and may not fully solve the problem!

When using Biofeed® **OXY-LINE™**, oxygen levels rise and *anaerobic* conditions usually disappear within days, sludge begins to break-down faster and feed efficiency improves as overall water quality improves. Also, your ponds biological activity will begin to become more conducive to fish and shrimp health.

Numerous trials and university studies have proven the effectiveness of Biofeed® **OXY-LINE™** products in a variety of ponds.

During the grow-out cycle, water conditions may become toxic as ammonia and sludge levels rise and oxygen levels fall. This often leads to outbreaks of disease which can wipe out your entire crop of fish or shrimp in days! In your pond there are countless populations of bacteria at work trying to maintain a natural balance between sludge digestion, nitrogen cycling and oxygen levels. Both your fish or shrimp and the bacteria in your ponds require adequate dissolved oxygen to grow.

2

Biofeed Solutions, Inc., brings a new approach to improving soil and water oxygenation. Our exciting NEW! HDH Enzyme Technology naturally releases elemental oxygen right into your soil and pond water! This action creates a more aerobic environment that helps your fish and shrimp grow healthier, faster and more disease-free!

Our long-time customers say: "This Stuff Works!"

Use Biofeed® OXY-POND™ with or without mechanical aeration to improve pond water quality.

Contact your Biofeed® Dealer today for a profitable pond management program to meet your aquatic needs!
